

Futures and Options (GB.3335.01)

Fall 2012

Professor Menachem Brenner

Course Description: This is a course in derivatives markets: structure, valuation and strategies. The main applications include the equities markets, foreign exchange and commodities.

It has two parts: The first part deals with the structure of forward and futures markets, pricing and hedging with such contracts. The second and larger part deals with options markets; strategies, pricing and position analysis. It includes topics like: Short Selling, Value at Risk, Exotic Options, Volatility Derivatives and Trading Volatility. The course will consist of lectures, discussions and problem solving.

Prerequisites: All core courses. This course requires a basic knowledge of futures and options. Remind yourself of the basic features of futures, calls, puts and payoff diagrams.

Exams and Grading: The final grade will be based on a mid-term exam and a final exam (multiple-choice exams). The mid-term will have a weight of 30% and the final a weight of 70%. Class participation may improve your grade. The grade distribution is: A (25%-30%), B (50%-60%); C (5%-10%); D, F (remainder if any).

Problem Sets: Posted on Blackboard. There will be 7-8 problem sets. Solutions to the problem sets will be provided after you have had a chance to solve them. Additional problems will be presented and discussed in class.

Required Material: You are responsible for the material covered in class, for all announcements made in class, for material posted on Blackboard and sent by e-mail. The problem sets and all handouts are part of the class material.

Required book: Hull John (H) Options, Futures and Other Derivatives, Prentice Hall, 8th ed. The book is not a substitute for the lecture notes and class discussions. Some topics and details are not covered by the book.

Recommended book: Sundaram Rangarajan and Sanjiv Das, Derivatives, Principles and Practice. McGraw-Hill/Irwin, 2010.

Market Tracking: You are expected to follow the markets on a daily basis. In particular, you should pay attention to 'fair value' of Gold, SPX and NDX futures, and implied volatility from index options (e.g. VIX, VXN). **Market tracking questions may appear on the exam.**

Your internet 'favorites' should include; CME, CBOE, **iseoptions**, **optionmetrics**.

You are also expected to read the financial press. Pay special attention to the futures and options columns in the **WSJ&FT**. You may also be interested in reading **RISK** and the **Economist**.

E-mail: Check your email regularly for additional material, announcements, assignments.

Office Hours: Wednesday 2:00-4:00, Thursday 4:00-6:00 & by appointment.

Office; Rm. 9-55. KMEC

Homepage: Other information appears on the Stern Web Site (stern.nyu.edu/~mbrenner)

Classroom Responsibilities:

Class Attendance: Students are expected to attend all classes and be on time.

Cell phones: You should turn off your cell phone before you enter the class.

No Laptops, Blackberries, or any email/internet devices are allowed in class.

Honor Code: You are responsible for maintaining Stern's honor code.
