Lottery Processing

The lottery system will evaluate all of your primary selections first. If any of your primary selections are closed at the time your courses are evaluated, the system will only look at the corresponding alternate for the closed course. If the alternate course is available and does not conflict with any primary courses you will then be registered into your alternate choice.

**IMPORTANT:** Be sure to select alternate courses! In the event that your primary selection is closed alternate selections will be evaluated for availability and increase your odds of getting a full schedule.

**HELPFUL HINT:** To minimize conflicts between primaries and alternates try to select alternates that are scheduled at the same time as the corresponding primary selection.

For Example: Looking at the selections above, if your primary 2 selection is closed the system will place you in your alternate 2 selection (unless the course is also closed). If your alternate 2 selection were a Monday 6:00 PM course the system would detect a conflict with your Primary 1 selection and would be unable to register you.
By Application Courses

For more information on these courses and how to apply, please visit our Course Announcements page.

Courses Capacities

Except for the courses listed below, the maximum enrollment capacity in electives are generally set between 50-70.

Please note:
This list is not inclusive of all term offerings and enrollment capacities are subject to change.
